Education

University of Texas at Austin	Aug 2023 – May 2028
Bachelor of Science in Computer Science	Austin, TX
Bachelor of Science in Electrical and Computer Engineering	GPA: 3.6/4.0

Experience

Ajou University School of Medicine	Jun 2024 – Sep 2024
<i>Clinical AI Research Intern</i>	<i>Suwon, South Korea</i>
- Co-authored 2 SCI-indexed JMIR papers with 11 citations by building BERT and GPT-based NLP pipelines for public-health text. - Cut CDM ETL runtime by 23% by porting R pipelines to Python and replacing repeated row-wise lookups with hash joins, improving complexity from O(N × M) to O(N + M).	

LooxidLabs	Jun 2022 – Jan 2023
<i>Paid Project Intern Product Analytics</i>	<i>Seoul, South Korea</i>
Analyzed data from 200+ alpha testers for a VR mental-health device and translated tester feedback into product validation, branding, business strategy, and patent development recommendations.	

Projects

Ajou Course Manager Django, Docker, React, PDFMiner, OpenAI API, PostgreSQL	Oct 2025 – Feb 2026
- Developed and maintained a production course manager platform for Ajou University School of Medicine, serving 40+ professors, 200+ students, and 100+ courses. - Automated administrative tasks by implementing CRUD workflows and bulk XLSX imports/edits, saving professors 10+ hours per week. - Integrated AI-driven PDF parsing and data extraction using OpenAI API, reducing manual review time by 25%.	

Tessera ESP32, C/C++, PN532 NFC, PySide6, AES-256-GCM, SQLCipher	Mar 2026 – Present
- Led a team that placed 7th of 700 in the ROK Army Startup Competition by building an offline Electronic Health Record dog-tag system. - Engineered ESP32 firmware to read and decrypt compressed AES-256-GCM records in under 0.1 second, and developed a PySide6/SQLCipher desktop app for offline serial provisioning.	

Sisyphus C#, .NET 8, WPF, Windows Registry, Windows Internals (IFEO)	Apr 2026 – Present
- Engineered and launched a WPF focus utility using C#/.NET 8 and Windows Internals (IFEO), reaching 60+ downloads within the first week of V1.0 release. - Developed AI-assisted feedback, reminders, and task-management workflows using activity context and user-entered tasks .	

Alpaca Trading Bot Python, SQLite (WAL), Streamlit, systemd, Telegram API	Jan 2026 – Present
- Deployed a continuously running Python trading engine and Streamlit dashboard as independent systemd services with automatic restart, journald logging, and SQLite WAL concurrency. - Automated real-time paper-trade execution using Alpaca market data and delivered trade, fill, and failure alerts through Telegram. - Median Alpaca API round-trip latency reduced by 250 ms through benchmarking VPS regions and deploying the system in New Jersey.	

Leadership & Activities

2nd Infantry Division Sustainment Brigade	Jun 2025 – Dec 2026
<i>KATUSA Sergeant (E-5), Brigade Unit Ministry Team</i>	<i>Camp Humphreys, South Korea</i>
- Provided tactical translation for the United Nations Command during ROK–U.S. combined exercises. - Earned the Army Commendation Medal and Army Achievement Medal for consistent and excellent translation support.	

Faculty Applicant Interviewer	Spring 2024
<i>Chandra Family Department of Electrical and Computer Engineering</i>	<i>University of Texas at Austin</i>
Participated in 10 faculty hiring interviews after being recommended by faculty and the advisory board.	

Texas Convergent	Spring 2024
<i>IoT Build Team Tech Member</i>	<i>University of Texas at Austin</i>
Launched an NFC-authenticated alarm system and pitched it to 200+ students and an Austin-based VC.	

Directed Reading Program	Spring 2023 – Spring 2024
<i>Natural Language Reasoning Team</i>	<i>University of Texas at Austin</i>
Led weekly reading discussions on CoT and o1-style reasoning papers, covering 17 papers with UT CS Ph.D. mentorship.	

Skills

Programming Languages: ARM Assembly, C, C++, C#, Java, JavaScript, Python, TypeScript
Frameworks & Systems: .NET, AWS, Django, Docker, Git, Kubernetes, Linux, Next.js, Node.js, PostgreSQL, React, SQLite, Streamlit
